 ■ Very High

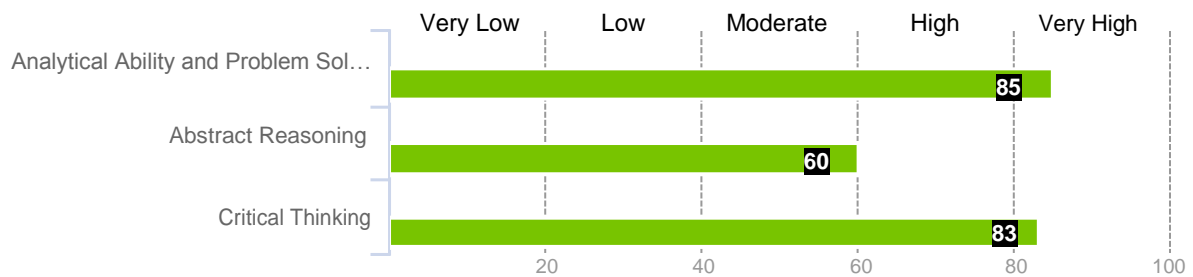

Recommendation

Recommended

Reasoning Ability

The ability of an individual to analyse and perceive the given information from different perspectives.

Values shown in above chart are percentages

Very Low Low Moderate High Very High

Analytical Ability and Problem Solving: Very High

Very likely to integrate issues and factors onto a conceptual framework. May have strong ability to reason and provide systematic solution to a given problem by breaking it down into simple cases, then evaluating different alternatives to the problem in a step by step manner. May be able to analyze or perceive a given information from different perspectives.

Abstract Reasoning: High

Likely to have the ability to quickly identify patterns and the logical rule underlying those patterns to arrive at solutions. May be able to gather work related information quickly, from various sources and apply it in innovative ways to solve problems. May have good lateral thinking abilities and fluid intelligence. May be creative in thinking and in integrating data logically to arrive at solutions.

Critical Thinking: Very High

Very likely to have the ability to think out-of-the-box to solve various problems. May be able to assess the effectiveness of the opposing argument to test the validity of the proposition.

Numerical Ability

The ability to perceive and process numbers and related symbols to perform basic arithmetic operations.

Values shown in above chart are percentages

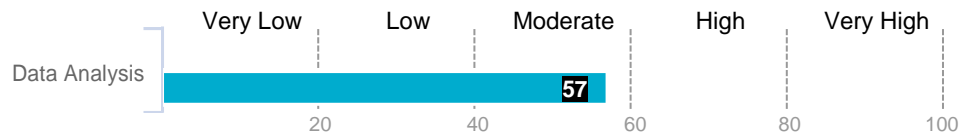

Very Low Low Moderate High Very High

Numerical Ability: High

Likely to perceive and process numbers and related symbols to perform basic arithmetic operations and perform estimates. May have high level of speed in making analysis or assessments based on given information and an excellent level of concentration in solving problems.

Data Analysis

The ability to structure observations that are obtained by different data sources.

Values shown in above chart are percentages

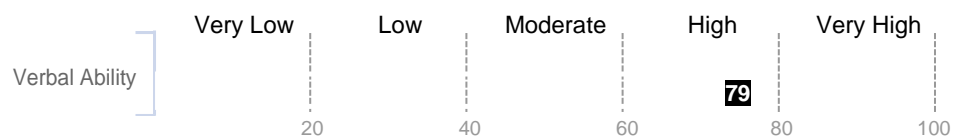

Very Low Low Moderate High Very High

Data Analysis: Moderate

Moderately likely to structure and analyse observations that are obtained by different data sources. May be moderate in inspection, selection, transformation and remodelling of data in order to derive a conclusion for any particular situation. May have the ability to break down a big problem into smaller parts for better understanding of the problem, in order to solve the problem efficiently.

Verbal Ability

The ability to understand word meanings, word relationships and also interpret detailed information.

Values shown in above chart are percentages

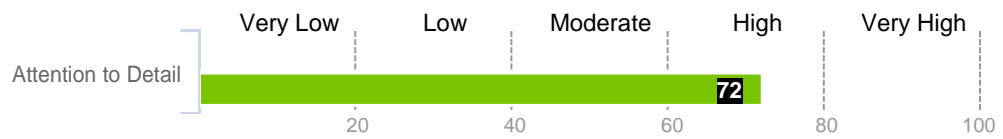

Very Low Low Moderate High Very High

Verbal Ability: High

Likely to have a good vocabulary. May be good at proper usage of grammar and punctuation. May be good at understanding word meanings, word relationships and also in interpreting detailed information.

Attention To Detail

The ability to capture every minute detail and present the work in a clear, complete, precise and easy to understand language.

Values shown in above chart are percentages

Very Low Low Moderate High Very High

Attention to Detail: High

Likely to notice everything that might be of importance, at any point of time. Likely to be able to capture every minute detail and present the work in a clear, complete, precise and easy to understand language. May be attentive, focused and good at giving excellent results, maintaining excellent quality.

Test Log

31 Aug,2018

- 06:28 pm Started the test with Attention to Detail
- 06:34 pm Finished Attention to Detail and went to Numerical Ability and Data Analysis of the test
- 06:38 pm Went to Reasoning Ability of the test
- 06:47 pm Went to Verbal Ability of the test
- 06:50 pm Finished the test
